- A. Use a Text Widget.
- B. Assign a new Task to each rep.
- C. Use the Highlights Panel.
- D. Send out a mass email.

✓ Answer: A

Question 34

Cloud Kicks has an administrator team that manages the org. The company has asked for a small subset of leadership users to have Modify All access, like the administrators have. How should the administrator team accomplish this?

- A. Assign the standard Platform User profile to the leadership users and edit the permissions to Modify All access.
- B. Assign the standard System Administrator profile to the leadership users that includes the Modify All access.
- C. Assign the standard User profile to the leadership users and add a custom permission set with Modify All access.
- D. Clone the standard User profile to the leadership users and assign a Modify All role to grant access.

✓ Answer: C

Question 35

Senior leadership wants to be notified of any opportunities over \$250,000 with more than a 75% probability of closing. Which feature should a Platform Administrator set up to facilitate this?

- A. Guidance for Success

- B. Big Deal Alerts
- C. Reports and Dashboards
- D. Similar Opportunities

✓ Answer: B

Question 36

Sales reps at Ursa Major Solar are having difficulty managing deals. The leadership team has asked a Platform Administrator to help sales reps prioritize and close more deals. What should the administrator configure to help with these issues?

- A. Einstein Search Personalization
- B. Einstein Lead Scoring
- C. Einstein Opportunity Scoring
- D. Einstein Activity Capture

✓ Answer: C

Question 37

Users at Cloud Kicks are reporting different options when updating a custom picklist on the Opportunity object based on the kind of opportunity.

- A. Related lookup filters
- B. Record type
- C. Picklist value sets
- D. Fields and relationships

✓ Answer: B

Question 38

An administrator at DreamHouse Realty needs to create customized pages for the Salesforce mobile app. Which two types of pages should a Platform Administrator build and customize using the Lightning App Builder?

- A. App page
- B. User page
- C. Record page
- D. Dashboard page

✓ Answer: A, C

Question 39

Universal Containers (UC) has a private sharing model for Opportunities and uses Opportunity teams. Criteria-based sharing rules are not used. A sales rep at UC leaves the company, and their user record is deactivated. The rep is later rehired in the same role. A Platform Administrator activates the old user record.

The user is added to the same default Opportunity teams but is no longer able to see the same records the user worked on before leaving the company. What is the likely cause?

- A. The stage of the opportunity records was changed to Closed Lost.
- B. The record type of the opportunity records was changed.
- C. The records were manually shared with the user.
- D. Permission sets were removed when the user was deactivated.

✓ Answer: C

Question 40

Cloud Kicks uses the standard Account Type field to indicate different account tiers. Users find this confusing, so management has asked that the field be changed to read "Tier" on the page layouts. How should a Platform Administrator implement this change?

- A. Edit the Type field and change the name.
- B. Use Rename Tabs and Labels.
- C. Build a custom field called Tier and delete Type.
- D. Create a global picklist value set.

✓ Answer: B

Question 41

A Platform Administrator is building an agent to nurture leads. How does Agentforce SDR help?

- A. Generate a dynamic call script and talking points for the human sales reps to use.
- B. Autonomously negotiate pricing with the lead and close the final deal.
- C. Analyze the performance of human sales reps and provide coaching tips.
- D. Answer the lead's questions with responses that are grounded in company data.

✓ Answer: A

Question 42

Universal Containers' Platform Administrator has been asked to create a many-to-many relationship between two existing custom objects. Which two steps should the administrator take when enabling the many-to-many relationship?

- A. Create a junction with a custom object.
- B. Create two master-detail relationships on the new object.
- C. Create URL fields on a custom object.
- D. Create two lookup relationships on the new object.

✓ Answer: A, B

Question 43

A Platform Administrator at Universal Containers has a screen flow that helps users create new leads. When Lead Source is "Search Engine", the administrator needs to require the user to choose a specific search engine from a picklist. If Lead Source is not "Search Engine", this picklist should be hidden. What is the most efficient way for the administrator to complete this requirement?

- A. Use a conditional filter in the screen element to only show the Specific Search Engine field only when Lead Source is "Search Engine".
- B. Use Assignment elements; one for when Lead Source is "Search Engine" and one for everything else.
- C. Create a picklist for Specific Search Engine, and set conditional visibility so that it is only shown when Lead Source is "Search Engine".
- D. Add a button for the Activity Timeline in the Object Manager for the Account object.

✓ Answer: C

Question 44

The Activity Timeline is missing from the Account record page. What should a Platform Administrator do to correct this?

- A. Add the standard Activities component to the Account Lightning record page.
- B. Update the user's permission to allow Edit access to the Activity Timeline.
- C. Run a report to verify whether any activities have been logged for that Account.
- D. Add a button for the Activity Timeline in the Object Manager for the Account object.

✓ Answer: A

Question 45

A Platform Administrator wants to limit the kinds of reports their users can create. Which tool should the administrator use?

- A. Hide Report Types
- B. Report Folder Sharing
- C. Standard Report Types
- D. Joined Report

✓ Answer: A

Question 46

Agentforce is escalating cases to the support team, but the support team complains they have no context and have to ask the customer to repeat everything. Which configuration issue is the most likely cause of this issue?

- A. The support team members are missing the Agentforce User permission set.
- B. The support team's case page layout is missing the agent history component.
- C. The agent's instructions are preventing the history and context from being saved.
- D. The handoff is creating a new case instead of transferring the existing session.

✓ Answer: D

Question 47

A Platform Administrator creates a custom text area field on the Account object and adds it to the service team's page layout. The service team manager loves the addition of this field and wants it to appear in the highlights panel so that the service reps can quickly find it when on the Account page.

- A. In the Account object manager, create a custom compact layout.
- B. Make the field required and move it to the top of the page.
- C. Create a new page layout and a new section titled highlights panel.
- D. From the page layout editor, drag the field to the highlights panel.

✓ Answer: A

Question 48

A Platform Administrator at Ursa Major Solar wants to add prepopulated subjects for Tasks and Events. Tasks should have the subjects "Schedule Site Visit" and "Send Contract", while Events should have the subjects "Site Visit" and "Ride Along". What should the administrator configure to achieve this requirement?

- A. Add the new values to the predefined field values for the global actions New Event and New Task.
- B. Add Schedule Site Visit and Send Contract picklist values for the Task subject field. Add Site Visit and Ride Along picklist values for the Event subject field.
- C. Create a new custom Subject picklist field on Activity and add the field values.
- D. Include Schedule Site Visit, Send Contract, Site Visit, and Ride Along picklist values for the Activity subject field.

✓ Answer: A

Question 49

Ursa Major Solar's Platform Administrator is editing the page layout for a new custom object. A text area field is accidentally removed from the page layout, and it needs to be restored to the page layout. What are two methods for achieving this goal?

- A. Clone the layout from a different profile and use save as.
- B. Restore original page layout from a sandbox.
- C. Restore from the recycle bin within 15 days.
- D. From the fields palette, drag the field into the same position.

✓ Answer: B, D

Question 50

A Platform Administrator at Cloud Kicks would like to use Salesforce to start tracking details around its marketing efforts. They would like to track details around emails, trade shows, and webinars. Additionally, each of these initiatives will need to track different types of information. How should the administrator accomplish this?

- A. Create a custom report type with relevant fields.
- B. Create a custom field on the Campaign object for the type of initiative.
- C. Create record types and page layouts for each type of campaign.

D. Use campaign hierarchies to organize campaign types.

✓ Answer: C

Question 51

A Platform Administrator created a new prompt template and is testing it. Every time the administrator tests the template, it gives a different response. Why is the prompt template giving different responses each time it's run?

- A. Prompt Builder caches the large language model's response, so the prompt is only sent once for every template the administrator creates.
- B. Every time the administrator runs a prompt template in Prompt Builder, it creates a unique call to the large language model.
- C. The prompt is only sent to the large language model after the administrator deploys the template to a live agent, not when the prompt is run in the builder.
- D. Prompt Builder runs a simulated call to the large language model to save on costs, so the prompt is never sent to the actual model.

✓ Answer: B

Question 52

Management at Universal Containers would like to share dashboard components with their team in Chatter but currently does not have access to this capability. How should a Platform Administrator make this functionality available to management?

- A. Enable reporting snapshots.
- B. Select Download Chart on the component.
- C. Set View Dashboard As to the dashboard viewer.
- D. Enable dashboard feed tracking.

✓ Answer: D

Question 53

Sales reps miss key fields when filling out an opportunity record through the sales process. Reps need to move forward in stages but are unable to enter a previous stage. Which three options should a Platform Administrator use to address this need?

- A. Mark fields required on the page layout.
- B. Use Flow to mark fields required.
- C. Configure Opportunity Path.
- D. Use validation rules.
- E. Enable guided selling.

✓ Answer: C, D, E

Question 54

What is an Agentforce use case in a sales organization?

- A. Generating cold calls
- B. Automating all marketing content
- C. Providing basic web bot chats
- D. Automating Lead Qualification

✓ Answer: D

Question 55

Cloud Kicks needs to be able to show different picklist values for sales and marketing users. Which two options meet this requirement?

- A. Two permission sets, one record type, one picklist
- B. One record type, two profiles, one picklist
- C. One page layout, two record types, one picklist
- D. Two page layouts, one record type, two picklists

✓ Answer: C, D

Question 56

A Platform Administrator at Cloud Kicks has a flow in production that is supposed to create new records. However, no new records are being created. What is causing the issue?

- A. The flow is inactive.
- B. The flow URL is deactivated.
- C. The flow is Read Only.
- D. The flow trigger is missing.

✓ Answer: A

Question 57

A sales manager receives a URL to a Dashboard folder containing several dashboards. However, when the sales manager clicks on the URL, a message appears stating, "We couldn't find the record you're trying to access."

- A. The sales manager does not have the correct permission set.
- B. The sales manager needs the correct sales user profile.
- C. The Dashboard folder is set to Private.
- D. View access has not been granted to the Dashboard folder.

✓ Answer: D

Question 58

A Platform Administrator needs to configure an approval process for the sales team when opportunities that meet particular conditions are closed. How should the administrator make sure the right records are included in the process?

- A. Add Specific Entry Criteria.
- B. Use Dynamic Forms to display a button.
- C. Create a screen flow.
- D. Add a validation rule to the opportunity.

✓ Answer: A

Question 59

A Platform Administrator has reviewed an upcoming critical update. How should the administrator proceed with activation of the critical update?

- A. Allow the critical update to auto-activate in a sandbox.
- B. Activate the critical update in production.
- C. Activate the critical update in a sandbox.
- D. Allow the critical update to auto-activate.

✓ Answer: C

Question 60

A Platform Administrator assigned a custom profile based on the Minimum Access named Salesforce profile to a group of new users and assigned them several existing permission sets. However, when the users log in, they do not see the Lightning interface. Which action should the administrator take to give the users access to the Lightning interface?

- A. Enable the Enhanced Interface for User Access Policies.
- B. Add Lightning component to a layout.
- C. Create a page in Lightning App Builder with the org as default.
- D. Assign a permission to enable Lightning Experience User.

✓ Answer: D

Question 61

The VP of sales at Cloud Kicks has a standard sales profile and is receiving an error message that prevents them from saving an opportunity. A Platform Administrator attempted the same edit without receiving an error. How should the administrator troubleshoot this issue?

- A. Log in as a system administrator to troubleshoot.
- B. Use 'Login as' to log in as the user.
- C. Use an AppExchange product to troubleshoot.
- D. Ask the user for their password so the admin can log in as the user.

✓ Answer: B

Question 62

A Platform Administrator for Cloud Kicks has created a screen flow to help service reps ask the same set of questions when customers call in with issues. This screen should be visible from cases. How should the administrator distribute the screen flow?

- A. Page Layout
- B. Home Page
- C. Lightning Page
- D. Component Filter

✓ Answer: C

Question 63

A Platform Administrator is creating a new action instruction for an agent. This action, named createCase, is designed to generate a new Salesforce Case record based on the user's conversation with the agent. Which set of Action Instructions should the administrator use for the createCase action, according to best practices for action instructions?

- A. "This action provides the ability to create a new case record in the Salesforce system. Its function is to simply save customer information as a record. Use this when the user wants to create a case."
- B. "Use this action to create a new Salesforce Case record. The goal is to document a customer's issue in the system. Use this when the user's intent is to create a formal record of their problem or question."
- C. "Creates a new case record in the system for any type of customer inquiry. The purpose of this is to ensure a record of the interaction is saved."
- D. "The createCase code snippet is configured to create a case. It runs in the background to handle the user's request to log a new issue. Its purpose is to solve the customer's issue."

✓ Answer: B

Question 64

Cloud Kicks has a custom object called Shipments. The company wants to see all the shipment items from an Account page. When an Account is deleted, the shipments should remain. Which type of relationship should a Platform Administrator make between Shipments and Accounts?

- A. Accounts should have a lookup to Shipments.
- B. Shipments should have a master detail to Accounts.
- C. Shipments should have a lookup to Account.
- D. Accounts should have a master detail to Shipments.

✓ Answer: C

Question 65

Northern Trail Outfitters uses a custom Invoice object to collect customer payment information from an external billing system. The Billing System field needs to be filled in on every Invoice record. How should a Platform Administrator ensure this requirement?

- A. Create a flow to update the field.

- B. Require the field on the record type.
- C. Define an approval process for the field.
- D. Make the field universally required.

✓ Answer: D

Question 66

Universal Containers requires that when an opportunity is closed won, all other open opportunities on the same account must be rendered as Closed Lost. Which automation solution should a Platform Administrator use to implement this request?

- A. Flow Builder
- B. Outbound Message
- C. Flow Orchestration
- D. Quick Action

✓ Answer: A

Question 67

A user is unable to relate a task to the Course custom object. What should a Platform Administrator do to allow tasks to be related to courses?

- A. Create a sharing rule for the Course object to grant the user Read/Write access.
- B. Select Allow Activities on the Course object in Object Manager.
- C. Add the Open Activities related list to the Course page layout.
- D. Update the user's profile to grant them Edit access to the Task object.

✓ Answer: B

- A. Case Assignment Rules
- B. Email-to-Case
- C. Omni-Channel
- D. Lead Assignment Rules

✓ Answer: C

Question 73

Cloud Kicks is concerned that not everyone on the sales team is entering key data into accounts and opportunities that they own. Also, the team is concerned that if the key information changes, it does not get

updated in Salesforce. A Platform Administrator wants to get a better understanding of their data quality and record completeness. What should the administrator do to accomplish this?

- A. Explore AppExchange for data quality and record completeness solutions.
- B. Create a report for Accounts and Opportunities highlighting missing data.
- C. Subscribe the sales reps to a monthly report for accounts and opportunities.
- D. Configure the key fields as required fields on the page layout.

✓ Answer: B

Question 74

Northern Trail Outfitters has two different sales processes: one for business opportunities with four stages and one for partner opportunities with eight stages. Both processes will vary in page layouts and picklist value options. What should a Platform Administrator configure to meet these requirements?

- A. Different page layouts that control the picklist values for the opportunity types
- B. Separate record types and sales processes for the different types of opportunities
- C. Validation rules that ensure that users are entering accurate sales stage information
- D. Public groups to limit record types and sales processes for opportunities

✓ Answer: B

Question 75

Cloud Kicks has hired a new sales executive who wants to implement a document merge solution in Salesforce. How should a Platform Administrator implement this solution?

- A. Download the solution from AppExchange.
- B. Install a package from the Partner Portal.
- C. Create a managed package in AppExchange.
- D. Configure the package from Salesforce Setup.

✓ Answer: A

Question 76

When Agentforce performs its grounding check, it examines source information, the topic instructions, and scope. Which additional information does the agent look for during its grounding check?

- A. Incompatible data types
- B. Prompt injection risks
- C. Encrypted fields
- D. The web for information verification

✓ Answer: B

Question 77

Cloud Kicks needs to change the owner of a case when it has been open for more than 7 days. What should a Platform Administrator use to complete this requirement?

- A. Escalation Rules
- B. Auto Response Rules
- C. Assignment Rules
- D. Validation Rules

✓ Answer: A

Question 78

Cloud Kicks has three teams of customer service reps that use a custom field on the Case object to populate the team assigned to manage the tickets. The customer support manager would like a Custom Dashboard to show data specific to each team. What should a Platform Administrator do to meet this requirement?

- A. Create separate Dashboards for each Customer Support team.
- B. Create a Dashboard with widgets specific to each team.
- C. Create a Dashboard that uses Dashboard filters to show specific team data.
- D. Add Cross Filters to switch between the three customer service teams.

✓ Answer: B

Question 79

Cloud Kicks has the organization wide defaults for Opportunity set to Private. Which two features should a Platform Administrator use to open up access to opportunity records for sales users working on collaborative deals?

- A. Sharing rules
- B. Sharing set
- C. Role hierarchy
- D. Profiles

✓ Answer: A, C

Question 80

A Platform Administrator is adding a new topic to an agent. What is best practice for topic instructions?

- A. Write the instructions generically to allow the agent maximum flexibility in its reasoning.
- B. Include an extended list of example user questions so the agent can learn from patterns.
- C. Keep instructions as minimal as possible to reduce agent latency.
- D. Add business-specific language rather than plain language.

✓ Answer: D

Question 81

A Platform Administrator at Cloud Kicks has a request from the finance team that all won opportunities over a certain value must be checked for accuracy before the deal can be considered fully closed. The assigned finance team member, as well as the sellers' manager, both must sign off on the deal, with the manager doing so first. Then, the finance team member must sign off, for a total of up to three sign-offs per opportunity. How should the administrator address this request?

- A. Create a screen flow that runs anytime an opportunity is closed.
- B. Add a Lightning web component to the opportunity page to capture the details in an approval record.
- C. Create a quick action to send emails to both the manager and the finance team member.
- D. Create an approval process with specific steps.

✓ Answer: D

Question 82

Cloud Kicks wants users to only be able to choose the opportunity stage Closed Won if the Lead source has been selected. How should a Platform Administrator accomplish this goal?

- A. Make Lead source a dependent picklist to the Opportunity Stage field.
- B. Change the Opportunity Stage field to Read Only on the page layout.
- C. Configure a validation rule requiring Lead source when the stage is set to Closed Won.
- D. Make the opportunity stage a dependent picklist to the Lead source.

✓ Answer: C

Question 83

Which two solutions is a Platform Administrator able to find on AppExchange to enhance their organization?

- A. Components
- B. Customers
- C. Communities
- D. Consultants

✓ Answer: A, D

Question 84

Sales managers would like to know what could be implemented to surface important values based on the stage of the opportunity? Which tool should a Platform Administrator use to meet this requirement?

- A. Workflow Rules
- B. Path Key Fields
- C. Opportunity Processes
- D. Dynamic Forms

✓ Answer: B

Question 85

A sales rep wants to be able to categorize multiple picklist values into a single value on a report. Which option should a Platform Administrator suggest to the sales rep to accomplish this?

- A. Bucket Column
- B. Unique Count
- C. Report Filter
- D. Chart

✓ Answer: A

Question 86

Northern Trail Outfitters has a new flow that automatically sets field values when a new account is created. The flow is launched by a process, but the flow is not working properly. What should a Platform Administrator do to identify the problem?

- A. View the Setup Audit Trail and review for errors.
- B. Set up email logs and review the send error logs.
- C. Use the native debug feature in Flow Builder.
- D. Review debug logs with the flow logging level.

✓ Answer: C

Question 87

A sales rep has left the company, and a Platform Administrator has been asked to re-assign all their accounts and opportunities to a new sales rep and keep the team as is. Which tool should the administrator use to accomplish this?

- A. Data Loader
- B. Dataloader.io
- C. Mass Transfer Records
- D. Data Import Wizard

✓ Answer: C

Question 88

Ursa Major Solar has its business hours set from 9:00 AM to 5:00 PM for the reps that are on Pacific Time. The reps on Eastern Time need business hours set to start 3 hours earlier to cover for support. How should a Platform Administrator solve for this issue?

- A. Adjust the current business hours to accommodate the Eastern time zone.
- B. Allow the reps to set business hours manually.
- C. Set temporary business hours for each time zone.
- D. Create one set of business hours per time zone.

✓ Answer: D

Question 89

A Platform Administrator at Cloud Kicks received a request from the head of sales operations to create a process in which opportunities must be validated by specific team leaders based on a mix of criteria. When the administrator analysed the list of criteria, they found that there were 30 potential sets of criteria that would identify the proper person to route the request to. How should the administrator fulfill this request?

- A. Create a button on the opportunity that brings up an email template to send to the correct leader.
- B. Create an approval process with specific entry criteria and approval steps for each of the sets of criteria specified.
- C. Create a record triggered flow orchestration to properly route the requests.
- D. Use a screen flow to allow the seller to input the criteria in a form that is then sent to the appropriate leader.

✓ Answer: C

Question 90

Users at Cloud Kicks want to see information that is more useful for their role on the Case page. How should a Platform Administrator make the pages more dynamic and easier to use?

- A. Add component visibility filters to the components.
- B. Include more tab components with filters.
- C. Remove fields from the record details component.
- D. Delete the extra components from the page.

✓ Answer: A

Question 91

A sales rep has a list of 300 accounts with contacts that they want to load at one time. Which tool should a Platform Administrator utilize to import the records to Salesforce?

- A. Manual Import
- B. Data Import Wizard
- C. Dataloader.io
- D. Data Loader

✓ Answer: B

Question 92

Cloud Kicks is working on a rebrand. In which two areas of the Salesforce mobile app can a Platform Administrator customize the branding?

- A. App header color
- B. Record background color
- C. Loading page logo
- D. Header background color

✓ Answer: C, D

Question 93

Which two data loss considerations should a Platform Administrator keep in mind when changing a custom field type from Text to Picklist?

- A. Auto updates will be made to Visualforce references to prevent data loss.
- B. Any list view based on the custom field is deleted.
- C. There will be no data loss with use of a global value set.
- D. Assignment and escalation rules may be affected.

✓ Answer: B, D

Question 94

Cloud Kicks wants to ensure that every client has support based on the level of service that has been agreed on in the sales cycle. There are tiers to this support model, Gold, Silver, and Bronze. What should a Platform Administrator create to ensure that this is part of every client's account once they become a client?

- A. A flow to assign Entitlements
- B. Routing Configuration for each client
- C. Email to Case for each service level

✓ Answer: A

Question 95

What are three characteristics of a master-detail relationship?

- A. Permissions for the detail record are set independently of the master.
- B. The master object can be a standard or custom object.
- C. Roll-up summaries are supported in master-detail relationships.
- D. The owner field on the detail records is the owner of the master record.
- E. Each object can have up to five master-detail relationships.

✓ Answer: B, C, D

Question 96

A Platform Administrator for Cloud Kicks needs to ensure that only the financial records belonging to each individual user are visible on the report in order to meet scope of the data privacy requirements. How should the administrator achieve this?

- A. Set sharing model as Public Read/Write for the respective object(s).
- B. Set sharing model as Private for the respective object(s).
- C. Create multiple reports, each filtered to show records owned by each user.
- D. Use Apex sharing to hide records.

✓ Answer: B

Question 97

One of the sales managers at Universal Containers will be going on leave for several months. The executives want to make sure the sales manager does not log in to Salesforce while on leave. What should a Platform Administrator do to ensure the user is not able to log in while on leave?

- A. Reassign the user's license during leave.
- B. Change the Login Hours for the profile.
- C. Freeze the user's account.
- D. Restrict Login IP Addresses for the profile.

✓ Answer: C

Question 98

A new agent is being developed to help customer service reps process customer requests for a replacement product. The agent needs to call an action that takes two inputs: productId: An 18 character ID for the product being replaced reasonCode: A three-digit code representing the reason for the replacement Which set of agent instructions should a Platform Administrator use for these inputs, according to best practices for Agentforce instructions?

- A. Instructions for productId: "The 18 character ID of the product." Instructions for reasonCode: "A numerical code."
- B. Instructions for productId: "The product ID. Retrieve this from the conversation history or the user's input." Instructions for reasonCode: "The three-digit replacement reason. This is required when the product ID is present."
- C. Instructions for productId: "ID from the product record." Instructions for reasonCode: "Code for the reason."
- D. Instructions for productId: "The 18 character ID of the product. Retrieve this from the conversation history or the user's input. Required." Instructions for reasonCode: "A three-digit code that specifies the reason for replacement. This is required only when the product ID is present."

✓ Answer: D

- A. The username was not configured in the format of an email address.
- B. The email address and username must be unique across all Salesforce orgs.
- C. The username must be unique across all Salesforce orgs.
- D. The username has a restricted domain name within it.

✓ Answer: C

Question 123

Universal Containers (UC) customers have provided feedback that their support cases are not being responded to quickly enough. UC wants to send all unassigned cases that have been open for more than 2 hours to an urgent Case queue and alert the support manager. Which feature should a Platform Administrator configure to meet this requirement?

- A. Case Scheduled Reports
- B. Case Dashboard Refreshes
- C. Case Escalation Rules
- D. Case Assignment Rules

✓ Answer: C

Question 124

When a qualified lead is converted, what happens to its related records?

- A. Records from custom objects are attached to the resulting contact, account, and opportunity records.
- B. Open activities only are attached to the resulting contact, account, and opportunity records.
- C. All activities are attached to the resulting contact, account, and opportunity records.
- D. Campaign history is attached to the resulting contact, account, and opportunity records.

✓ Answer: A

Question 125

A Platform Administrator deactivates an agent to add a new topic and action. What happens to any ongoing user conversations with the agent?

- A. The agent will pause the conversation and resume once reactivated.
- B. The agent will continue conversations using the deactivated agent until reactivated.
- C. The agent window automatically closes to prevent new messages.
- D. The agent will send a system error message as a response to any new messages.

✓ Answer: B

Question 126

At Cloud Kicks, when a rep needs to seek additional support help, there's a series of actions the company wants to ensure are taken. The steps include sending an email and changing the status and owner of the case. What should a Platform Administrator use to give the reps an easy way to make these updates?

- A. Case Assignment Rules
- B. Macros with Quick Actions
- C. Quick Text with Email Templates
- D. Autolaunched Flows with Email Alerts

✓ Answer: B

Question 127

There are multiple system administrators at Cloud Kicks that make configuration changes. Which tool gives the system administrators the ability to track these changes?

- A. Health Check
- B. Setup Audit Trail
- C. History Tracking
- D. Feed Tracking

✓ Answer: B

Question 128

A salesperson complains that the Log a Call button is missing from the highlights panel of an Opportunity page. What is the reason for this?

- A. The Log a Call action will appear within the Activity Component as a standard behavior rather than the highlights panel.
- B. The Log a Call action has not been added to the Salesforce Mobile and Lightning Experience Actions section of the page layout.
- C. The custom Log a Call permission is missing from the user's profile and assigned permission sets.
- D. The custom Log a Call permission has been disabled at the org level in Setup.

✓ Answer: B

Question 129

Which feature gives a sales team the ability to prioritize deals with recent updates in the List view and Kanban view?

- A. Big Deal Alerts
- B. Report Filters
- C. Deal Change Highlights
- D. Opportunity Path

✓ Answer: C

Which feature should a Platform Administrator implement to help the sales team quickly determine where they are in the sales process and what is required of them?

- A. Reports & Dashboards
- B. Opportunity Sales Path
- C. Big Deal Alerts
- D. List Views

✓ Answer: B

Question 132

The sales reps at Cloud Kicks should be able to report on each other's account and opportunity records with the organization-wide default for Account and Opportunity both set to Private. What should a Platform Administrator do to achieve this?

- A. Create an owner-based sharing rule for Accounts with sharing between a Public Group of Sales Reps and Read Only Opportunity Access.
- B. Create an Account and Opportunity report to show any owned by each member of the Sales Team and save the report into a shared report folder.
- C. Utilize Apex sharing to programmatically share records between a group of Sales Rep users.
- D. Create manual sharing to share specific account and opportunity records between the sales reps.

✓ Answer: A

Question 133

133. Ursa Major Solar wants to see collaboration and updates across various Chatter groups, records, and announcements from the CEO in a single place.

What should a Platform Administrator configure to achieve this? - ☐ A. Chatter Group - ☐ B. Chatter Daily Digest - ☐ C. Chatter Feed - ☐ D. Chatter Stream

✓ Answer: D

Question 134

What are three characteristics of a master-detail relationship?

- A. Each object can have up to five master-detail relationships.
- B. Permissions for the detail record are set independently of the master.
- C. Roll-up summaries are supported in master-detail relationships.
- D. The master object can be a standard or custom object.
- E. The owner field on the detail records is the owner of the master record.

✓ Answer: B, C, D

Question 135

Universal Containers wants to track all stakeholders involved in its sales opportunities to ensure proper relationship management. Sales reps need to identify who has decision-making authority, who influences the buying process, and who serves as the primary contact for each deal. The sales manager wants visibility into these relationships to help coach reps on stakeholder management strategies. Which feature should a Platform Administrator configure to meet this requirement?

- A. Configure opportunity team members to track internal and external stakeholders.
- B. Set up account teams to track stakeholders across multiple opportunities.
- C. Use standard fields on opportunities to track stakeholder information.
- D. Use contact roles on opportunities to identify stakeholder involvement and influence.

✓ Answer: D

Question 136

A Platform Administrator at Cloud Kicks needs to temporarily remove one dashboard from a shared folder with several dashboards to make some required changes. How should the administrator achieve this?

- A. Remove View access to the shared folder.
- B. Edit the dashboard properties and move it to a private dashboards folder.
- C. Remove the permission set to the dashboard from the users.
- D. Create a private group and add the dashboard to it.

✓ Answer: B

Question 137

The VP of sales at AW Computing would like sales reps to check in with their top account every Monday. The VP would like a dashboard component to show the status of the check-ins. What should a Platform Administrator configure to remind the reps to contact their top account?

- A. Create a time-based workflow task.
- B. Enable the creation of recurring tasks.
- C. Add the email action to the page layout.
- D. Use a process email alert on the account.

✓ Answer: B

Question 138

In an approval process, what happens when a queue is selected as the approver?

- A. The queue requires unanimous approval from all of its members before the record is approved.
- B. Any member of the queue can approve or reject the record and the queue is treated as a single entity.
- C. Only the queue owner is notified about the approval request, not its members.
- D. The queue can only be used for objects that do not support individual user approvals.

✓ Answer: B

Question 139

The call center manager at Ursa Major Solar wants to provide agents with a case dashboard that can be drilled down by case origin, status, and owner. What should a Platform Administrator add to the dashboard to fulfill the request?

- A. Dashboard Filter
- B. Dashboard Widget
- C. Combination Chart
- D. Bucket Column

✓ Answer: A

Question 140

A Platform Administrator is building an agent to help an ecommerce support team. The agent needs to call an action, named `updateShippingAddress`, that modifies a customer's shipping address in the system.

- A. "Use this to update shipping information. It's used for any changes to a customer's address in the system."
- B. "This action updates the customer's shipping address. It is to be used when a user wants to change their address. Only use this when a customer does not have an active order in the system."
- C. "This action allows for the changing of a shipping address, and the goal is to make sure the address is current and accurate."
- D. "Updates the shipping address for a customer order. The goal of the action is to modify the address on a customer's record. The agent should only use this action when the user explicitly requests to change their address."

✓ Answer: D

Question 141

- A. Group Rows
- B. Filter Logic
- C. Detail Column

D. Bucket Column

✓ Answer: D

Question 147

Universal Containers wants to ensure that cases are routed to the right people at the right time, but there is a growing support organization. The business wants to be able to move people around and adjust the work they get without having to request extra assistance or rely on the administrator teams. Which tool allows the business to control its own assignment of work?

- A. Case Assignment Rules
- B. Email-to-Case
- C. Omni-Channel
- D. Lead Assignment Rules

✓ Answer: C

Question 148

Cloud Kicks is concerned that not everyone on the sales team is entering key data into accounts and opportunities that they own. Also, the team is concerned that if the key information changes, it does not get updated in Salesforce. A Platform Administrator wants to get a better understanding of their data quality and record completeness. What should the administrator do to accomplish this?

- A. Explore AppExchange for data quality and record completeness solutions.
- B. Create a report for Accounts and Opportunities highlighting missing data.
- C. Subscribe the sales reps to a monthly report for accounts and opportunities.
- D. Configure the key fields as required fields on the page layout.

✓ Answer: B

Question 149

Northern Trail Outfitters has two different sales processes: one for business opportunities with four stages and one for partner opportunities with eight stages. Both processes will vary in page layouts and picklist value options. What should a Platform Administrator configure to meet these requirements?

- A. Different page layouts that control the picklist values for the opportunity types
- B. Separate record types and sales processes for the different types of opportunities
- C. Validation rules that ensure that users are entering accurate sales stage information
- D. Public groups to limit record types and sales processes for opportunities

✓ Answer: B

Question 150

- A. Field Update
- B. Email Alert
- C. Chatter Post
- D. Autolaunched Flow

✓ Answer: A, B

Question 154

At Cloud Kicks, sales reps use discounts on the opportunity record to help win sales on particular products. When an opportunity is won, they then have to manually apply the discount to the related opportunity products. The sales manager has asked if there is a way to automate this time-consuming task. What should a Platform Administrator use to deliver this requirement?

- A. Approval Process
- B. Formula Field
- C. Flow Builder
- D. Prebuilt Macro

✓ Answer: C

Question 155

A Platform Administrator at Cloud Kicks is setting up a new Salesforce instance. The business requirements mandate that the marketers are given access to opportunities in order to maintain the campaign relationships on each opportunity. The administrator decides to assign the Marketing User profile. What should the administrator do next to achieve this requirement?

- A. Edit the object permissions to include Opportunity.
- B. Add a custom permission set to include Opportunity.
- C. Edit the role to enable Sales access.
- D. Configure the assigned apps to include Opportunity.

✓ Answer: B

Question 156

Cloud Kicks has implemented an Employee Agent to answer benefits questions for its employees. How should a Platform Administrator prevent the agent from responding to staff members' questions about the CEO's private health plan and benefits?

- A. Configure assignment rules to assign the agent to employee data.
- B. Ensure the users' permissions and field-level security restrict access to the CEO's health plan.
- C. Modify the agent's instructions and guardrails to block questions related to the CEO's health plan.
- D. Train the agent on employee health plans instead of the CEO's health plan.

✓ Answer: C

Question 157

Northern Trail Outfitters has the Case object set to private. The support manager raised a concern that reps have a broader view of data than expected and can see all cases on their group's dashboards. What is causing reps to have inappropriate access to data on dashboards?

- A. Dashboard Filters
- B. Public Dashboards
- C. Dashboard's running user
- D. Dashboard Subscriptions

✓ Answer: C

Question 158

- A. Data Loader
- B. Data Import Wizard
- C. Data Cloud Connection
- D. Data Export Service

✓ Answer: A

Question 163

The Cloud Kicks CFO requires any opportunity over \$100,000 to be automatically sent to them, so they can sign off on the record before the deal closes. Which feature should a Platform Administrator use to fulfill this requirement?

- A. Submit for Approval button
- B. Einstein Next Best Action
- C. Apex Triggers
- D. Flow Approvals

✓ Answer: D

Question 164

Universal Containers wants to implement collaborative selling where multiple roles work together on customer accounts. Sales reps need full access to their assigned accounts, while customer support reps and sales engineers need access to opportunities and cases related to specific accounts they support. The sales manager wants to streamline the process by automatically adding the same team members to multiple accounts. Which feature should a Platform Administrator configure to meet this requirement?

- A. Set up default account teams with specified access levels for different team roles.
- B. Create sharing rules to grant access to opportunities and cases for support teams.
- C. Configure role hierarchy to automatically grant account access to the appropriate teams.
- D. Use permission sets to provide additional access to account-related records.

✓ Answer: A

Question 165

A Platform Administrator wants to customize the navigation menu for users in the Salesforce mobile app. The organization has not yet implemented any Lightning apps for mobile use. Which statement about the Mobile Only app navigation is correct?

- A. Lightning pages and Visualforce pages automatically appear in the Mobile Only navigation menu without requiring tabs to be created first.
- B. The Mobile Only app can be customized to show different navigation menus for different user profiles and permission sets.

- C. The first four items in the Mobile Only navigation menu appear both in the navigation menu and in the navigation bar at the bottom of the screen.
- D. The Mobile Only app automatically includes all standard Salesforce objects in the navigation menu based on user permissions.

✓ **Answer: C**

Question 166

Cloud Kicks has hired a new marketing analyst to help manage events and marketing campaigns. When logging in to Salesforce, the marketing analyst is not able to edit any campaigns or add campaign members.

What should a Platform Administrator do to resolve this?

- A. Move the marketing user to a higher role in the role hierarchy.
- B. Change the user to have the System Administrator profile.
- C. Assign the Marketing User feature license to the user record.
- D. Assign the View All Data permission to the marketing analyst.

✓ **Answer: C**
