Question 52 of 65

Choose 1 option.

A Platform Administrator created a new prompt template and is testing it. Every time the administrator tests the template, it gives a different response.

Why is the prompt template giving different responses each time it's run?

- ☐ A. The prompt is only sent to the large language model after the administrator deploys the template to a live agent, not when the prompt is run in the builder.
- ☐ B. Prompt Builder caches the large language model's response, so the prompt is only sent once for every template the administrator creates.
- ☐ C. Prompt Builder runs a simulated call to the large language model to save on costs, so the prompt is never sent to the actual model.
- ☒ D. Every time the administrator runs a prompt template in Prompt Builder, it creates a unique call to the large language model.
